How can I have a div go from collapsed to expanded (and vice versa), but do so from right to left?

Most everything I see out there is always left to right.

jquery   html   css   jquery-ui   position

```
$("#slide").animate({width:'toggle'},350);
```

```php
class Student
{
    public $name;
    public $mobile;
    public $num;

    public function __construct()
    {
        echo "object 誕生";          2
    }

    public function intro()
    {
        $result = "Hi , I'm $this->num $this->name - $this->mobile";
        echo "$result <br>";
    }
}

$s1 = new Student();          1
$s1->name = 'amy';
$s1->mobile = '0911-111-111';
$s1->num = 1;
dd($s1);          3
$s1->intro();          4
```

2 object 誕生

3 Student Object
(
    [name] => amy
    [mobile] => 0911-111-111
    [num] => 1
)
Hi , I'm 1 amy - 0911-111-111

4 object 誕生

Student Object
(
    [name] => bob
    [mobile] => 0922-222-222
    [num] => 2
)
Hi , I'm 2 bob - 0922-222-222
